

# Biology Majors

Things to do BEFORE and After you see your Advisor...

1. Consider the classes you need to graduate before talking to your advisor.
2. Write down your options/classes on a piece of paper for your advisor to review.
3. Approximately 15 minutes before your appointment bring your student ID to check out your file from the Biology Office, BSC Room 2035.
4. While you are checking out your folder, don't forget to obtain a blank advising sheet from the office.
5. After getting advised, return your file and carbon copied advising sheet (the yellow copy) to the office in your folder. Keep the original advising sheet (white copy) for your records.
6. Before leaving the office, pick-up your ID card.

. . . Now you are "Early Registration" ready! . . .
