

**VSU Biology Department
Twelfth Annual Graduate Student Research Symposium
November 5, 2020
Bailey Science Center Room (to be determined)**

Oral Presentations:

- 1:00 Christian Burch Sex reversal in *Mytella charruana* during starvation
- 1:15 Damion Castellano Characterizing haustoria of late leaf spot disease in peanut
- 1:30 Matthew Cowan Quantitative Analysis of the Trends Exhibited in Four Organ Types Along With Ten Cell Types and Four Organ Types
- 1:45 Kenyanna Taylor Effects of mixing elemental sulfur with demethylation inhibitors (DMI) and quinone outside inhibitors (QOI) on the management of late leaf spot (*Nothopassalora personata*) and rust (*Puccinia arachidis*) of peanut (*Arachis hypogaea*)".

Poster Presentations:

- Willie Hill Enthalpy- Entropy Compensation in the Binding of Ligands to Serum Albumin

Poster Presentations: Second floor of the Bailey Science Center, in the open area outside of the Biology Department office. Posters will be up by 1:00PM on Friday. Graduate students will be available for one-hour time periods during the week of Nov. 4 – Nov. 8 to discuss their posters in a socially-distanced manner.
